

All requirements for knowledge of Morse code should not be removed, for the reasons I stated in RM-10782 petition. Also there is nothing to substantiate that there is less reason for the requirements for Morse code today. The need is equal if not more, due to unpredictable interference & periods of poor band conditions. Whether we are enjoying casual contacts or emergency work, CW has proven to be very useful & reliable. Its narrow bandwidth also serves as a big advantage in radio communications.
